

Dear students who have joined the Mathematics family by gaining admission to the Firat University Mathematics Department,

I congratulate you and wish you continued success. The Firat University Mathematics Department was established in 1975 and has been providing education for 49 years. Since its founding, our department, with its highly qualified academic staff, has achieved many successes and is among the leading mathematics departments in our country. Mathematics forms the foundation of natural and engineering sciences. Today, due to the increasing needs in other fields, the usage of mathematics is expanding and continuously evolving.

Our primary mission as the Mathematics Department is to provide students with a strong mathematics education, equipping them with the knowledge and skills necessary to conduct qualified work in mathematics or related disciplines. Additionally, we aim to cultivate scientists who are capable of advancing in mathematics, view continuous development as a way of life, think creatively and critically, express their thoughts with confidence, contribute to the progress of society and science, are aware of

their ethical responsibilities, possess a work ethic, and are entrepreneurial. Other important goals include publishing research articles in national and international journals, contributing to science by participating in national and international conferences, preparing projects, and helping to develop resources in the field of mathematics.

In our program, which is designed to meet these objectives, in addition to core mathematics courses, there are numerous elective courses. The purpose of these electives is to guide students toward the areas of mathematics they are interested in. Our graduates can pursue academic careers at universities, or work in financial institutions, the computer and software industries, educational institutions, banking and insurance sectors, R&D units of public and private organizations, and similar institutions.

I would like to remind you that for more detailed information about the Fırat University Faculty of Science Mathematics Department, you can visit our website or come in person for information. I congratulate our valued students and their esteemed families, and wish you all a successful higher education experience.

Prof. Dr. Muhittin Evren AYDIN

Head of the Mathematics Department

yanı sıra çok sayıda seçmeli ders bulunmaktadır. Seçmeli derslerin amacı, öğrencileri matematiğin ilgi duydukları alanlarına yöneltmektir. Mezun öğrencilerimiz üniversitelerde akademik kariyer yapabildikleri gibi finans kuruluşlarında, bilgisayar ve yazılım endüstrisinde, eğitim kurumlarında, bankacılık ve sigortacılık alanlarında, kamu kuruluşlarının ve özel şirketlerin AR-GE birimlerinde ve benzeri kuruluşlarda çalışabilmektedirler.

Fırat Üniversitesi Fen Fakültesi Matematik Bölümü hakkında daha detaylı bilgi almak için web sitemizi ziyaret edebileceğiniz gibi bölümümüzü ziyaret ederek de bilgi alabileceğinizi hatırlatmak isterim. Bölümümüze yerleşen değerli öğrencilerimizi ve kıymetli ailelerini tebrik ediyor, başarılı bir yükseköğrenim hayatı diliyorum.

**Prof. Dr. Hasan BULUT**

**Matematik Bölüm Başkanı**
