

Department Department of Mathematics			Academic Year 2022-2023	Date 01/12/2022	
Course Unit Code FİZ2103	Course Unit Title Physics Laboratory I (Mechanical)		Semester/Year Fall/ 2	Number of ECTS Credits 2	
Language of Instruction	Turkish				
Type of Course Unit	Compulsory				
Prerequisites and co-requisites	-				
Address of course	-				
Local Credit	Theoretical	Practical	Laboratory	Presentation	Project
2	0	2	-	-	-
Name of Lecturers	Associate Professor Fethi DAĞDELEN				
Assistants	-				

Course content	Measurement, velocity and acceleration, study of simple and physical pendulums, free fall, motion of accelerated systems, centripetal force, standing waves, central collision and conservation of momentum, conservation of angular momentum, study of motions in a spiral spring, conservation of energy.
-----------------------	---

Weekly Detailed Course Contents	
Week	Topic
1	Laboratory preparation and grouping
2	Measurement and error calculation
3	Experiment 1. Velocity and Acceleration
4	Experiment 2. Examining Simple and Physical Pendulums
5	Experiment 3. Free Fall
6	Experiment 4. Movements of Accelerated Systems
7	Experiment 5. Centripetal Force
8	Experiment 6. Standing Waves
9	General application
10	Experiment 7. Central Collision and Conservation of Momentum
11	Experiment 8. Conservation of Angular Momentum
12	Experiment 9: Investigation of Movements in the Coiled Spring
13	Experiment 10: Conservation of Energy
14	A brief evaluation of the course content and topics

Course Resources	Physics for Science and Engineers Volume I, Translation Kemal Çolakoğlu
-------------------------	---

Assessment Methods and Criteria	In-Term studies	Quantity	Percentage (%)
	Mid-Term Exams	1	40
	Quizzes	-	-
	Assignments	-	-
	Projects	-	-
	Term assignment	-	-
	Laboratory	-	-
	Other	-	-
	Final exam	1	60
On Assessment Methods and Criteria	A grade of success; the relative evaluation system or the discretion of the instructor. In order to be taken into consideration in the courses in which the relative evaluation system and teaching staff's discretion are applied, the final exam score of the student must be at least YSAS. Students who fall below this score are considered to fail directly. For the courses that can not be evaluated with the relative evaluation system, the letter grades of the success grades are determined by the consent of the		

	instructor teaching the table by 100 points by the Senate, using the distribution of the raw success grades at the end of the semester. A student who has received a grade AA, BA, BB, CB or CC grade is deemed to have completed that course. A student who has received one of the grade DC or DD grades is deemed to have fulfilled that course condition. In order for a student who takes DD and DC letters to be counted as successful, the GNO must be at least 2.00. A student who receives a graded FF grade is considered to have failed that course
--	--

Percentage of Course Category (%)	Mathematics and Basic Sciences	100
	Computer Sciences	0
	Programming Design	0
	Social sciences	0

Course Outcome	Students studying in the fields of science and mathematics,
Aims of the course	To teach the concepts such as motion, force, speed, energy, which are found in the student, General Physics (mechanical)
The way of processing course	Face to face

Relation of the course with program outcomes				
Learning outcomes		1	2	3
1	To have advanced theoretical and applied knowledge in a way to prioritize the scientific approach supported by textbooks containing up-to-date information in the field, application tools and other resources			
2	Adapting and transferring the knowledge gained in the field to secondary education			
3	Ability to independently carry out an advanced study in the field			
4	Be aware of the necessity of lifelong learning and continuously improve their professional knowledge and skills.			
5	Using a foreign language at least at the European Language Portfolio B1 General Level, following the information in the field and being able to communicate with colleagues			
6	To be able to use information and communication technologies together with computer software at minimum advanced level of European computer license required by the field.			
7	Have the ability to make oral and written presentation in native language			
8	Having the ability to understand spoken English and use English at reading level			
9	To have the ability to assimilate mathematical concepts and understand the relationships between them, to recognize different aspects of the same concepts and relationships		X	
10	To have the ability to define and formulate the relationships between items in non-mathematical disciplines in the language of mathematics.			X
11	To have the ability to use mathematical knowledge in different problems			X
12	Having the ability to develop computer programs using mathematical knowledge			
Contribution of the course: 1:No 2:Partially 3:Completely				

Preparer: Associate Professor Fethi DAĞDELEN

Preparation date: 01/12/2022
